

# THE BENNINGTON EVENING BANNER

THIRTEENTH YEAR—NO 3690

BENNINGTON, VT., TUESDAY, JANUARY 25, 1916.

PRICE ONE CENT

Half the Noise In Congress Is Because Election Is Coming and Half the Rest Is From Greedy Ones Who Want War Profits to Keep Up

## TRY THIS FAMOUS HAIR TONIC FREE

It Won't Cost You a Cent if It Doesn't Stop Falling Hair and Remove All Dandruff Says W. L. Gokay.

Right away we want you to try Parisian Sage, one of the most delightful, refreshing and invigorating hair tonics the hair has ever known. If you have dandruff and Parisian Sage doesn't remove every trace of it—money back from your druggist. If your hair is falling or you have terrible scalp itch, Parisian Sage will stop both or money back.

It aims to prevent baldness by putting life and nourishment into the hair, and the first application makes your head feel so good that you will at once realize why we are so enthusiastic about Parisian Sage.

It's women's favorite hair tonic because it gives to the hair a brilliancy and lustre that fascinates and compels admiration. W. L. Gokay has scores of people who use Parisian Sage regularly and will tell you all about it.

## LOW PRICED ADVERTISING

FOR SALE

FOR SALE—To settle the estate of the late Albert Stockwell, the house and land on Bradford Street, Bennington. This property can be bought very reasonably. For price and all information see Nash & Hutchins, or J. E. Walbridge, Administrator. 501

FOR SALE—Two black colts, one 3 years old the other 2 years old. Well matched. Apply to H. N. Harrington, Pownal Center. Tel. 6-4. 502

FOR SALE—One 1915 Ford Touring car equipped with shock absorbers, at a low price. Bennington Garage, E. W. Williams. 411

FOR SALE—Don't pay rent; \$15.00 per month for 20 years, with interest, amounts to \$2,720.00. Buy a lot and save this. I can sell you a building lot on Main St., Grant St., Elm St., Weeks St., Dewey St., Putnam St., Washington St., McKinley St., Dunham St., Everett St., Convent St., Monument Ave., and several new streets. Geo. H. Dowdy, Agt. 503

WANTED

WANTED—Men to learn to drive and repair automobiles. Instruction and instruction in all branches of road service. Write for special offer, Maine Auto Company, 771 Forest Ave., Portland, Maine. 504

WANTED—Pupil nurses at the Taunton State Hospital Training School for Nurses. For particulars, see Mr. Arthur V. Goss, Sup't., Taunton State Hospital, Taunton, Mass. 505

TO RENT

WANTED—Woman to help do chamber work and wait on table. Steady work. Call up American House, Bennington, Vt. 506

WANTED—Competent woman for general housework. Liberal wages paid. Mrs. E. W. L. Bates, 215 Silver St. 507

TO RENT—Eight room house. Apply to Frank A. Thompson, 156 Beach St. 508

TO RENT—Tenement. Apply E. S. Harris, 121 Division St. 511

TO RENT—Two houses on Silver St., with all modern improvements. Apply to Melina H. Mason, 304 South St. 512

TO RENT—North side of tenement on North street, \$5 per month. Inquire of Richard Patterson 128 Scott St. 513

TO RENT—Three furnished steam-heated rooms, suitable for light housekeeping, in the Lewis house, formerly the Bruce Adams apartment on Pleasant street. Apply to Charles N. Powers, agent for the property. 514

NOTICE

NOTICE—Sligh ride parties cared for on short notice at Summit Hall, Pownal Center. Lunch or regular supper furnished if desired. Telephone 803-4. C. E. MYERS, Prop. 515

NOTICE—Instruction in elocution and physical training, coaching players, reading engagements, Herbert J. Hawkins, Graduate in and Pownal School of Expression. Address: Arlington, Vt. 516

LOST—One stock Certificate of the Free Press Association, a Vermont Corporation, said Certificate being dated February 20th, 1915, being numbered 116 and representing seven-tenths and one-half share of Capital Stock of said Corporation. Notify Holden and Healy Attorneys, Bennington, Vermont. 517

## WANTED

A first class man capable of handling the Tiffany Flat Ribbed Knitting Machine.

ADDRESS

The Wallace Wilson Hosiery Co., Frankford, Phila., Pa.

## FRENCH AVIATORS KILL AND WOUND 100 BULGARIANS

Flotilla of 16 Aircraft Raids City of Ghevgheli

TEUTONS CAPTURE SCUTARI

Floods and Bad Weather Interfere With Operations of British in Mesopotamia.

Saioniki, Jan. 25.—Sixteen French aeroplanes again bombarded the Bulgarian city of Ghevgheli today, killing and wounding more than a hundred persons.

London, Jan. 25.—The Austrians, in their progress southward across the Albanian frontier, have taken Albania's principal trade city—Scutari—and in addition have occupied Podgoritz, Dailograd, and Niksic in Montenegro. The Serbians forming the garrison at Scutari retreated southward, without resistance. The Austrian official communication reasserted that the Montenegrins are laying down their arms and that the populations in the towns occupied are receiving the invaders in a friendly manner.

Floods and generally bad weather are hampering the operations of the British against the Turks in Mesopotamia. The high water in the Tigris is preventing troop movements. During the lull in the fighting an armistice was declared for the burial of the dead.

In northwest Egypt the British have been successful in an attack on a camp of the Senussi tribesmen, the tribesmen being dispersed and their camp destroyed.

The military service bill has passed its third reading in the British House of Commons by a vote of 383 to 36. It has been sent to the House of Lords, which chamber is expected to pass the measure quickly.

NOTICE

Agreeable to the amended by-laws of the Village of Bennington, the members of the Bennington Fire Department, are hereby notified and warned to meet at the Stark Hose Co. rooms in the Village of Bennington on Friday, January 28th, 1916 at eight o'clock in the evening to transact the following business:

1st. To hear and consider the reports of the officers of the said department for the year past.

2nd. To elect a president, a vice-president, a clerk, a treasurer, a chief engineer, a first and second assistant engineers for the ensuing year.

3d. To transact any other business found necessary when met.

W. P. Hogan, Village Clerk. Bennington, Jan. 21, 1916.

HE COULD HARDLY GO

"About two years ago I got down on my back until I hardly could go," writes Solomon Bequette, Flat River, Mo. "I got a 50c box of Foley Kidney Pills and they straightened me right up." Common symptoms of kidney trouble are backache, headache, rheumatic pains, soreness and stiffness, puffiness under eyes, blurred vision, sleep disturbing bladder troubles, and a languid, tired feeling. Foley Kidney Pills help to eliminate the poisonous waste matter that causes these symptoms.

How to Cure Colds.

Avoid exposure and drafts. Eat right. Take Dr. King's New Discovery. It is prepared from Pine Tar, healing balsams and mild laxatives. Dr. King's New Discovery kills and expels the cold germs, soothes the irritated throat and allays inflammation. Search as you will, you cannot find a better cough and cold remedy. Its use over 45 years is guarantee of satisfaction.

Our Jitney Offer—This and 5c.

DON'T MISS THIS. Cut out this slip, enclose with 5c and mail it to Foley & Co., Chicago, Ill., writing your name and address clearly. You will receive in return a trial package containing Foley's Honey and Tar Compound, for coughs, colds and croup; Foley Kidney Pills, for pain in sides and back; rheumatism, backache, kidney and bladder ailments; and Foley Cathartic Tablets, a wholesome and thoroughly cleansing cathartic, for constipation, biliousness, head ache and sluggish bowels. Sold Everywhere.

## BENNINGTON BRIEFS

News of the Town and Village Told Briefly for Busy Readers

Dorothy Kelly and Hughie Mack—Harte theatre today. Adv.

See the bargains in furs at the Davis second hand store. Adv.

Mrs. George H. Cook of North st., is confined to the house by sickness.

For Sale:—Lunch wagon on South street. Inquire of Fred Corbett. Adv.

Born this morning a daughter to Mr. and Mrs. Edmond La Franchise of Spring street.

Tickets now on sale at the opera house for "Little Miss Susan," coming here Thursday night. Adv.

Wallace Reid and Cleo Ridgley, Lasky players, are featured in "The Chorus Lady" at the Harte theatre today. Adv.

Special sale all this week at the Davis second hand store, formerly the Shlimintzky store. See bargains in windows. Adv.

For sale at the Davis second hand store a good, chamber suite, sewing machine, gas stove, art square, morris chair, etc. Adv.

Miss Katharine Kinsley, who has been the guest of Mr. and Mrs. Clayton J. Kinsley, left Monday for her home in Burlington.

Tomorrow night at the Y. M. C. A. the Cusinos of North Adams will bowl against a picked team from those in the bowling tournament. This team went to North Adams last week and met with defeat.

Last night in the bowling tournament on the Y. M. C. A. alleys, although the Red Sox were handicapped by the lack of men, they succeeded with Sexton's 544 in taking two points from the Hillside.

Look this over. Can you beat this cast in a feature picture? Cleo Ridgley, Marjorie Daw, Mrs. Lewis Cord and Wallace Reid. They are appearing in "The Chorus Lady" 5c Paramount, Harte theatre today. Adv.

Harry B. Smith, whose wife is Adelle Pratt Smith, formerly of Bennington, has been appointed traveling inspector for the Merchenthaler Linotype company with a substantial increase in salary. His new job will bring Mr. Smith to Bennington about twice a year. Mr. and Mrs. Smith live in Brooklyn.

There will be a benefit at the opera house Sunday afternoon for the Jewish relief fund. The Jews of Poland, Russia, Galicia and the Balkans are the real sufferers in this war. Bennington people have been generous to Belgium, Serbia and the Armenians and the suffering, starving Jews of the war districts should not be neglected.

H. M. Ritchie addressed the Junior Boys' Club at the Y. M. C. A. last night, using Ty Cobb's baseball record as a basis for his remarks, and from the enthusiasm of the boys, it was evident that he made a home run. There was a record attendance, with three new boys coming next Monday. There will be an election of officers soon.

DISTRICT MEETING

This Masonic District Will Gather Here Friday.

The annual meeting of the second Masonic district of Vermont, F. & A. M., is to be held in Masonic temple here the coming Friday afternoon and evening. The opening of the Master Mason lodge at 3:30 will be under the direction of Red Mountain Lodge of Arlington. Adoniram Lodge of Manchester Center will confer the first section of the Master Mason degree with review of the work by A. S. Harriman, Grand Lecturer.

In the evening a reception will be given to the Grand Lodge officers with the conferring of second section of the Master Mason degree by Mount Anthony lodge.

Lectures will be by Tucker lodge of North Bennington. Balance Rock lodge of Readsboro will also be represented. The banquet will be given at 6 o'clock with addresses by distinguished visitors.

NIGHT SCHOOL RESUMED

Classes Meet in the Building On School Street.

The night school sewing classes begin this evening in the graded school after a ten-day recess on account of the high school fire. Announcement was previously made that sessions would be held in the E. L. Nichols store, but accommodations have since been found in the School street building where all sewing class pupils are instructed to report Tuesday and Thursday evenings until further notice.

Evening sessions of other classes began in the graded school building last evening but with poor attendance. They will continue there for the present. The class in German will be omitted this week on account of the illness of Mr. Mabrey.

## MAKING A RECORD

Methods by Which a Phonograph Disk Is Produced.

CATCHING THE SOUND WAVES.

They Are First Impressed in Wax and Then Transferred to a Negative in Copper, and From This Master Mold the Records Are Obtained.

The Edison phonograph, the graphophone type perfected by Bell and Tainter and the gramophone type by Berliner are all based on substantially the same principle. Sound waves set up in the air by any sound are allowed to strike a delicately held diaphragm, which vibrates under the impact of the sound waves. The vibrations are made to leave a record on a suitable medium, and this sound record is used to perform the inverse operation when it is required to reproduce recorded sounds—that is, the record is made to vibrate a sensitive diaphragm and set up in the air particular waves, which convey to the ear the impression of sound.

The differences in the systems are in the way in which the vibrations are recorded. The disk record, which made the machine popular, was first manufactured in the United States in 1897. Improvements in the machine and in the needles followed.

To make a gramophone record a person sings before the mouth of a horn, the object of which is to concentrate the energy of the sound waves upon the recording diaphragm. At the narrow end of the horn is the recording sound box and the machine with its attendant expert. There is a screen between singer and operator to guard the secrets of the sound box. On the farther side of the screen is a horizontal table carrying a wax tablet, rotated beneath the recording sound box at a uniform speed, usually about seventy-six revolutions per minute. As the table rotates it travels laterally at a uniform speed, and the wax tablet is thus caused to travel slowly under the stationary recording box.

The sapphire cutting point is lowered so as to enter the wax three and one-half to four one-thousandths of an inch, and as the machine runs it cuts a fine spiral groove, running from the edge to the center. The construction of the sound box is secret, as is the composition of the wax tablet.

The next step in the process is the reproduction of the record as a negative in copper. The wax is dusted with graphite and worked into the grooves with a badger brush to make it electro-conductive; then it is lowered into an electrolytic bath of copper salt solution. The wax is kept in continuous motion in the bath until the copper shell is nine-tenths of a millimeter in thickness.

This negative is a master, and from this a few commercial samples can be pressed to test the quality of the record. The manufacturers, however, wish to make thousands of copies without hurting their master; therefore they make duplicates of their master by taking impressions in wax composition, from which working matrices are made. Then copper shells are obtained from these in the same way. The copper shell is then backed by a brass plate one-half inch in thickness by soldering under pressure.

Then the matrix is nickel plated on the recorded side in order to wear better and after polishing is ready for the pressing machine. The commercial record is pressed into some substance hard at normal temperature and plastic under heat and very hard and smooth.

Various compounds are employed by different makers, but shellac is the principal ingredient. Shellac, wood charcoal, heavy spar and earthy coloring matter in certain proportions are used.

This compound after careful mixing is rolled into thin sheets and divided into sections, one for each record. The section is then pressed by a hydraulic press. The matrix is heated and placed face up in a mold, the label is placed face down on the matrix, and on this is placed in a warm, plastic state enough material for one record. Both halves of the press are furnished with cooling plates, through which streams of water can be passed, and the surfaces are cooled quickly. The record is then removed, the edges trimmed with emery wheels, and it is then ready for sale.—New York Times.

AN OLD PROVERB

It used to be proverbial that every man (and it is certainly no less true of women) is either a fool or a physician at forty. This means that every intelligent person must learn so much about caring for his own health that by the time he is forty years of age he can almost be reckoned as a physician.

Why, then, is there so much talk by doctors against "self-medication"? A woman can recognize all ordinary ailments without calling on a doctor. If they are ailments distinctive to her sex she generally knows enough to use that greatest of all remedies for such ailments, Lydia E. Pinkham's Vegetable Compound, and likewise she is familiar with the standard remedies for other diseases.

## HUDSON SUPER-SIX AUTO SENSATION OF THE YEAR

Has Broken All Stock Car Records Up to 100 Miles

The New Hudson Super-Six just announced at the New York show promises to be the biggest sensation of the year—even eight and twelve cylinder development does not rival in importance latest Hudson movement ideas of conventional automobile engineers must all be revised in light of the New Hudson invention.

The new seven-passenger Hudson Super-Six, just announced at the New York show has startled the motor world. This is not merely a new model with minor refinements. It is an absolute upheaval of all present impressions and beliefs regarding motors, and particularly six-cylinder motors. Even the rumor of the new Hudson car has for months kept motorists on edge. But the wildest rumor was tame compared to the truth. Its builders claim that the Super-Six begins a revolution and there seems every reason to anticipate that their belief is well founded. The heart of the new Hudson Super-Six lies in the motor, in which is comprehended a new invention of Hudson engineers.

The motor is patented and the name Super-Six is registered so that the full benefit of the discovery belongs solely to the Hudson company and to owners of Hudson cars.

The motor is no larger than last year's motor, 3½ x 5 inches, but the power has been increased by 80 per cent. The best power heretofore effectively produced by a six cylinder motor of this capacity was about 45 horse power. The new Hudson Super-Six, effectively uses 76 horse power. Yet the new motor is strictly conventional in every feature. It is simply an advance on the present type of standard motor, with the addition of the new discovery of the Hudson engineers. This utilizes more of the developed power. The motor develops about 84 horse power as in old type sixes, but owing to its absolute smoothness and lack of vibration, less than 8 horse power is consumed within the motor itself, leaving the immense margin of 76 horse power to be utilized in driving the car.

The Super-Six in an official test on the Sheepshead Bay Speedway under the rules and supervision of the American Automobile Association has broken all stock car records up to 100 miles. This was done with a real "stock" car. No change was made in compression, in pistons, in valves, in camshaft, oiling system, timing or in any other respect. The car was not only standard in all details, but it had a full 7-passenger body and equipment.

This story of the achievement of the Super-Six seems almost unbelievable, yet it is certified by a representative of the American Automobile Association, and by the technical editor of "Motor" who were official observers. Many tests of various kinds were made. With two passengers in the car and with windshield and top in place, the Super-Six made a record of 100 miles in 80 minutes, 21.4 seconds, or an average speed of 74.67 miles per hour.

On a two-mile lap one complete circuit of the track, its record was 76.75 miles per hour. This was done not once but several times. Many times in succession it made records of a mile in 1 minute and 33.4 seconds to 1 minute, 33.8 seconds, varying by the fraction of a second. The clock-like regularity was perfectly amazing to all observers.

With five passengers in the car and with windshield and top up, it exceeded 73 miles per hour and averaged over 70 miles in sixty minutes actual running.

From a standing start, 50 miles speed was obtained in 16.15 seconds and from five miles an hour to 50 miles an hour in 19.25 seconds. This on high gear.

The Hudson Super-Six develops the highest power per cubic inch displacement of any automobile motor ever built. The fuel consumption at 40 miles is about the same as like sized motors at 20 miles. The motor runs as smoothly at low speeds as it does at high speeds. This means that the life of the motor is increased due to its smoothness or lack of vibration. Therefore, this is not a motor that needs the usual overhauling every season, misuse or accidents, of course, excepted. The object of high speed in the motor is not merely high speed in the car. It can be utilized for speed if the driver wishes, but the fact that the motor is capable of this high speed insures power, flexibility, ease of control, quick acceleration and reserve capacity for difficult roads or hills. It gives the ability to creep at low speed on high gear. The Hudson Super-Six can be driven at a walking pace on high gear. It gives the ability to accelerate quickly, to climb hills on high gear and to avoid changing gears.

The new car attains the luxury of motion, the silent gliding at any speed in a way superior to anything before known. Every reason for an eight or twelve cylinder car has vanished, and no other car in either the six or the four cylinder class is in the slightest degree comparable to this new Hudson.

In beauty, luxury and finish the Hudson Company has done its best to reach the apex in the new car, both in open and closed models of which there are six. It is a masterpiece of beauty. The car has new body lines. The radiator is higher. The line of the car sweeps in an unbroken curve direct from the radiator to the back of the rear seat. The windshield is slanted. The car has the dividing cowl on the back of the front seat. All the upholstery is in genuine grain leather. No fabric leather is anywhere employed. The wheel base has been increased to 125¼". There is more room than ever before, yet the car retains its low, graceful, racy appearance, so much desired.

A new vacuum feed system with the supply tank in the rear of the car, and the feed tank beneath the cowl has been developed specially for the Hudson Super-Six. Also a new carburetor has been developed which is a marvel of inventive skill. Only one chassis is furnished for the Super-Six, but on this chassis are built six bodies, the phaeton, the touring sedan, the cabriolet, the limousine, the town car and the roadster. Prices range from \$1,375 for the phaeton to \$2,500 for the limousine and the town car, these prices being f. o. b., Detroit.

During the last six months the capacity of the Hudson factory has been practically doubled. The company is now building almost every part of its car in its own factory.

Demonstrators and sample cars are already being shipped and every assurance is given of prompt delivery to buyers immediately after Feb. 1. No one who wants a Hudson car will have to wait for it. The output for the year will be 30,000 cars. A greater number of high grade cars than ever before has been produced in the history of the industry.

The local representative of the Hudson, E. W. Williams, The Bennington Garage, Adv.

ACTRESS BRINGS SUIT

Miss Jessie Russell Injured by Fall Sues J. B. Harte.

Miss Jessie Russell, a vaudeville actress, who fell in the basement of Harte's theatre in Bennington, on December 13 and fractured her left arm while appearing in that theatre in a spectacular novelty, has filed suit through her attorney, Robert E. Healy, of the law firm of Holden & Healy of Bennington, against John B. Harte, manager and proprietor of Harte's theatre for \$5,000 damages. Miss Russell, who has been in the North Adams hospital under the care of Dr. M. M. Brown of that city, since the accident, was able to be removed to Bennington a few days ago.—North Adams Transcript.

Sandwich's Wonderful Drum.

The eccentric, hard Sandwhich had, according to his biographer, a strange passion for the thunder of big drums for the gratification of which passion he had caused the entire side of one large music room in his mansion at Hinchinbrook to be covered with parchment, so that when it was struck with a massive stick it gave out a roar sufficient to terrorize any sensitive soul. Many who heard this drum once struck positively declined ever to enter the apartment again lest they should be given a second performance.—St. Louis Republic.

Our Biggest Industry.

Measured by the number of persons employed, what is the country's biggest manufacturing industry? Lumbering, with its 48,000 sawmills, its \$1,000,000,000 investment in these plants and its employment of 605,000 men to operate them. This does not include, says the Nation's Business, the standing timber, which brings up the total investment to \$2,500,000,000.—Wall Street Journal.

WEATHER.

For eastern New York and western Vermont generally cloudy tonight and Wednesday. Probably rain or snow. Warmer tonight, colder Wednesday.

Two questions

puzzle and fret the average man. How shall he secure a living income for his family, if he dies, and independence in old age if he lives. Both are absolutely covered by our monthly income policies. We solicit inquiries. National Life Ins. Co., of Vt. (Mutual.) Earle S. Kinsley, General Agent, Mead Building, Rutland, Vermont. Adv.

## PUBLIC WELFARE ASSOCIATION OF BENNINGTON

New Organization Which Will Take Up Work of Civic League

ORGANIZED MONDAY EVENING

Constitution Was Adopted and Officers Elected at Meeting Held at Library Hall.

The meeting to reorganize the Civic League into an organization of larger membership and including both men and women was held Monday night at Library Hall.

The committee reported a new constitution which was adopted. The new organization is "The Public Welfare Association" of Bennington. Any person is eligible to membership and the dues are one dollar per year.

The officers elected are: President, Arthur J. Holden; Vice-Presidents, Robert E. Healy, Edmond LaFranchise, Mrs. W. W. Burke and Mrs. H. M. Ritchie; Secretary, Miss Hilda Pratt; Treasurer, W. H. Wills. Dr. C. F. Stimson of New York was present and explained proposed constitution and the work proposed. F. B. Pope was chairman of the meeting and W. H. Myers, secretary.

## WOMEN SUFFERERS NEED SWAMP-ROOT

Thousands upon thousands of women have kidney and bladder trouble and never suspect it.

Women's complaints often prove to be nothing else but kidney trouble, or the result of kidney or bladder disease.

If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.

You may suffer a great deal with pain in the back, headaches, loss of ambition, nervousness and may be despondent and irritable.

Don't delay starting treatment. Dr. Kilmer's Swamp-Root, a physician's prescription, obtained at any drug store, restores health to the kidneys and is just the remedy needed to overcome such conditions.

Get a fifty cent or one dollar bottle immediately from any drug store.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention the Bennington Evening Banner.
